Description

Our proposed application is a comprehensive sports database, potentially focusing on soccer, that will contain detailed information on players, teams, games, and statistics. The aim of the application is to provide easy access to the data stored in the database for sports enthusiasts. The database management system will be designed to be maintained and administered by sports teams or organizers.

The application will be designed to operate on a local machine. The user interface will be implemented using a web interface, which will provide users with an intuitive and user-friendly experience.
